FEMSA

NFPA® MEMBER

Veridian makes no compromises in constructing comfortable, performance-based fire protective apparel. Clever design elements with superior materials and workmanship are standard with every set of gear that we build. All Veridian gear is custom-made to each firefighter's measurements to ensure the best possible comfort and fit. Established in 1992, Veridian products have earned the respect and acceptance of customers around the world.

Veridian is a proud USA manufacturer, producing all of our gear in our ISO 9001 certified facilities in Spencer, IA & Quitman, AR.

Manufacturer of Quality Protective Gear

VELOCITY

Designed for Rapid Response.

Velocity's ergonomic design is engineered to provide fire-fighters with an unrestricted full range of motion. Ultra FlexKnee triple pleated trousers provide unsurpassed comfort. Velocity's Ultra FlexWing Expanded Back coat delivers a bind free reach. The FlexElbow adds outer shell pleats combined with liner darts to provide a natural contour at the elbow while complementing the integrated seamless underarm bellows. Engineered with minimal seams for maximum durability.

Also available for Proximity Aircraft Rescue Fire Fighting. Ask for the Vector Max series.

MAXSHIELD

Particulate Reduction System

Fire fighters are at increased risk from exposure to contaminants associated with products of combustion.

MAX SHIELD *features*

1. Designed to provide additional protection by reducing the infiltration of liquid and particulate toxic substances like smoke particles associated with fire gases.
2. Arm, leg and body protection at interface areas
   - **A.** Elasticized sleeve well gaiter protects against liquid and particulate intrusion at coat sleeve/glove interface.
   - **B.** Adjustable, elasticized waist gaiter attached to thermal liner shields interface between coat and pant. No extra steps required prior to engaging coat closures.
   - **C.** Elasticized leg gaitor protects against liquid and particulate intrusion at boot/pant interface.
3. Works in conjunction with ViperMax particulate barrier hoods

FIRE KNIGHT PROSLEEVE GLOVE

Particulate Reduction System

FIRE KNIGHT PROSLEEVE GLOVE *features*

- 3 layer composite sleeve gold Pioneer outer shell, Stedair 3000 moisture barrier and Nomex IIIA sewn to cuff of Fire Knight structural glove.
- Includes 2” lime/yellow 3M Scotchlite triple trim and postman slide take up strap.
- Designed to fit completely over end of coat sleeve to prevent gaps in thermal protection at wrist area.
- Provides reduced liquid and particulate infiltration at the coat sleeve/glove interface.

FIRE KNIGHT GLOVE

A true three-dimensional structural firefighting glove with curved finger design and inset thumb.

◀ Fire Knight · Structural Firefighting Gloves

- PBI & DuPont Kevlar knit back provides revolutionary flexibility, dexterity, and protection
- Contoured 2-piece Knuckle Guard form fitted design delivering increased flexibility and maximum protection
- 3 -Dimensional Design separate, curved, form fitting forchettes for TRUE finger dexterity
- GORE® CROSSTECH® Glove Insert provides unsurpassed durability and enduring barrier protection
- Exclusive breathable adhesive used to secure the liner. Liner guaranteed not to pull out.
- Palm is cowhide suede leather for excellent abrasion and heat resistance
- Grab Bar designed for quick and effortless donning
- Nomex®/Kevlar® knit thermal lining for excellent thermal protection

GORE® CROSSTECH® PRODUCTS

- Hook & Loop with Compression Snap/Zipper [Optional integrated belt with this closure]

FITTING AND MEASUREMENT GUIDE

IMPORTANT:
Your Veridian coat and/or trouser sizing will be more accurate if you take extra care with measurements. The following list of measurements are necessary for both men's and women's garments.

Coats:

1. Chest size: Measure loosely over clothing around the fullest part of the chest with the arms at rest. For individuals with broad shoulders, muscular arms and/or back, an additional over the arm-chest measure is extremely helpful. Again, measure loosely over fullest part of chest with arms at rest. Round up both measurements to nearest even size.

1a. Stomach: Please include measurement around stomach.

2. Sleeve length: You should expect that Veridian's standard sleeve length per size would fit a vast majority of fire fighters. Otherwise, with arms straight down to side, measure from the base of the back of the neck, over the shoulder and down the arm to the base of the thumb.

Trousers:

3. Waist: Measure around waist, over any clothing that would be worn under trousers. Typical men's measurement will be taken just above pant waist, or belt.

4. Inseam: Standard inseam lengths are available in one inch increments. Inseam length should be shorter than regular trouser inseam to prevent damage to cuffs. Measure from the crotch down the inside of the leg to the bottom of the ankle bone.

5. (Female) Hip: Measure around the fullest part of the hip area.

FITTING GUIDE

Get accurate measurments from the Veridian Guide Sizing Instructions video at www.veridian.net under the MEASURING GUIDE tab in the upper right hand corner. Veridian has Structural and Dual Certified Sizing sets available for purchase.
